

3cCourse Name: O Level (1<sup>st</sup> Sem) Topic: W3.CSS – Buttons (Part 10) Subject Web Designing & Publishing (WDP) Date: 18-June-2020

## W3.CSS – Buttons

W3.CSS provides various classes to design attractive buttons. All HTML elements can be defines as button using W3.CSS.

#### w3-btn

-- The **w3-btn** class defines a rectangular button with shadow effect when mouse is moved over it.

### w3-button

-- The **w3-button** class defines a rectangular button with gray color when mouse is moved over it.

#### w3-block

-- The w3-block class is used to give 100% width to the button.

# w3-ripple

-- The **w3-ripple** class is used to give ripple effects to the button when it is being clicked on.

## w3-disabled

-- The **w3-disabled** class is used to disable the button. The disabled buttons are semi transparent and cursor changes into hand when mouse is moved over it.

Other classes of W3.CSS can be used to style the button like: Color classes, Border classes, Margin classes, Round classes, Text, Font classes etc.

[w3-red, w3-hover-pink, w3-border, w3-margin, w3-round etc.]

National Institute of Electronics & Information Technology (NIELIT), Gorakhpur राष्ट्रीय इलेक्ट्रॉनिकी एवं सूचना प्रौदयोगिकी संस्थान, गोरखपुर
