

Listing Files with ls command without any arguments

The ls command without any options lists files and directories in a plain format without displaying much information like file types, permissions, modified date and time to mention just but a few.

Syntax

```
$ls
```

```
jamie@debian:~$ ls
Battle.net-Setup.exe  metamorphose2_0.8.2-1_all.deb  Pictures
Desktop              Music                          Public
Documents            Neofetch                      Templates
Downloads            pdfsam_3.3.6-1_all.deb        Videos
Linux_for_beginners.pdf  PDFsam_merge.pdf
```
