

Listing files in reverse order

To list files in reverse order, append the -r flag as shown

Syntax

```
$ ls -r
```

```
jamie@debian:~$ ls -r
Videos          pdfsam_3.3.6-1_all.deb      Downloads
Templates      Neofetch                   Documents
Public         Music                       Desktop
Pictures       metamorphose2_0.8.2-1_all.deb Battle.net-Setup.exe
PDFsam_merge.pdf Linux_for_beginners.pdf
```

As you can see above, the order of the listing has changed from the last to the first in comparison to the previous image.
