

W3.CSS is a CSS Framework

W3.CSS is a modern CSS framework with built-in responsiveness. It supports responsive mobile first design by default, and it is smaller and faster than similar CSS frameworks.

W3.CSS can also speed up and simplify web development because it is easier to learn, and easier to use than other CSS frameworks:

```
<!DOCTYPE html>
<html>
<title>W3.CSS</title>
<meta name="viewport" content="width=device-width, initial-scale=1">
<link rel="stylesheet" href="https://www.w3schools.com/w3css/4/w3.css">
<body>

<div class="w3-container w3-teal">
  <h1>My Car</h1>
</div>

<div class="w3-container">
  <p>A car is a wheeled, self-powered motor vehicle used for transportation.</p>
</div>

<div class="w3-container w3-teal">
  <p>My footer information</p>
</div>

</body>
</html>
```

W3.CSS is Free

W3.CSS is free to use. No license is necessary.
