Color Themes

W3.CSS provides excellent support for applying a theme to a website using its public domain theme css. Some of the examples are given below –

Sr. No.	CSS Name & Description
1	w3-theme-indigo.css CSS having Indigo variant colors
2	w3-theme-red.css CSS having Red variant colors

In order to use themes, go to the https://www.w3schools.com/w3css/w3css_downloads.asp to download the required CSS file.
