How to Adjust Mouse Settings

Steps for changing the mouse properties:

Step one: type control panel into the Cortana search box.

Step two: choose Control Panel (Desktop app) from Best match.

Step three: select Hardware and Sound if we view by Category.

Step four: click on the Mouse option under Devices and Printers.

Step five: modify the Buttons tab, which will be selected by default in the Mouse

Properties window

- We can check the Switch primary and secondary buttons option to make the right mouse button the primary one (that's how to reassign mouse buttons on Windows 10).
- We can also drag the button under Double-click speed are to choose a proper speed.
- Besides, the Turn on ClickLock allows we to highlight/drag without holding down the mouse button.

Step six: shift to Pointer Options tab to change mouse sensitivity.

- Obviously, we can drag the button under Select a pointer speed in Motion area to adjust the sensitivity of our mouse. This should be adjusted to better meet our habit.
- Besides, we can check Automatically move pointer to the default button in a dialog box according to needs.
- In addition, we can choose to Display pointer trails and determine the length of the trails.
- Finally, decide whether to check Hide pointer while typing and Show location of pointer when I press the CTRL key or not.

| Mouse Properties | × |
|---|--------|
| Buttons Pointers Pointer Options Wheel Hardware | |
| Motion Select a pointer speed: Slow Fast Enhance pointer precision | |
| Snap To Automatically move pointer to the default buttor dialog box | ı in a |
| Visibility Display pointer trails Short Hide pointer while typing | |
| Show location of pointer when I press the CTR | Lkey |
| OK Cancel | Apply |

Exercise:

1. Write the steps to change the properties of mouse.
