Course Name : O Level(B4-Ist sem.) Topic : Display Properties part-1 Subject : ITT&NB Date : 31-03-20

## **Display settings.**

Changing the size of text, display brightness, and screen resolution

We can modify the size of text and windows on the desktop to fit our personal preferences. We can also adjust the screen resolution, if necessary. During a normal Windows installation, the program tests the graphics card and displays the optimal size and resolution for that card.

- 1. In Windows, search for and open **Display settings**. We can also right-click an open area of the desktop and then select **Display settings**.
- 2. To change the Display orientation between Landscape and Portrait or to flip the orientation, select an option from the drop-down menu, then click **Keep Changes** or **Revert**.

Settings		
යි Home	Display	
Find a setting	Scale and layout	
System	Change the size of text, apps, and other items	
	250% (Recommended) ~	
🖵 Display	Advanced scaling settings	
40 Sound	Display resolution	
Notifications & actions	3840 × 2160 (Recommended) V	
D. F	Display orientation	
Pocus assist	Landscape ~	
O Power & sleep	Rotation lock	
Battery	On	

3. To change the size of text and windows, select the size we want from the drop-down menu.

Change the size of text, apps, and 250% (Recommended) Advanced scaling settings Display resolution 3840 × 2160 (Recommended) Display orientation	v

4. To adjust the brightness, click and drag the slider bar.

Changes take effect immediately.

5. To reduce the amount of blue light coming from the display, turn on **Night light**. To schedule the night light and change the hue, click **Night light settings**.

6. To change the Display resolution, select a resolution from the drop-down menu, then click **Keep Changes** or **Revert**.

## NOTE:

We recommend in most circumstances to use the native resolution of the monitor, which is marked as **Recommended**.
