Install Windows XP Professional:-

### Step 1: Insert Your Windows XP Bootable Disk

For this step, you will need to open your CD-Rom drive and insert your Windows XP disk. You can now close the CD-Rom Drive.

### Step 2: How to Boot From a CD

 After the station is off, you can restart it. While the station is restarting, begin pressing the F12 key over and over again. This will take you to the boot options menu. After you have pressed Enter, most Windows XP disks will prompt you to press any key to boot from the CD When this appears, you will have only a few seconds to press any key on the keyboard.
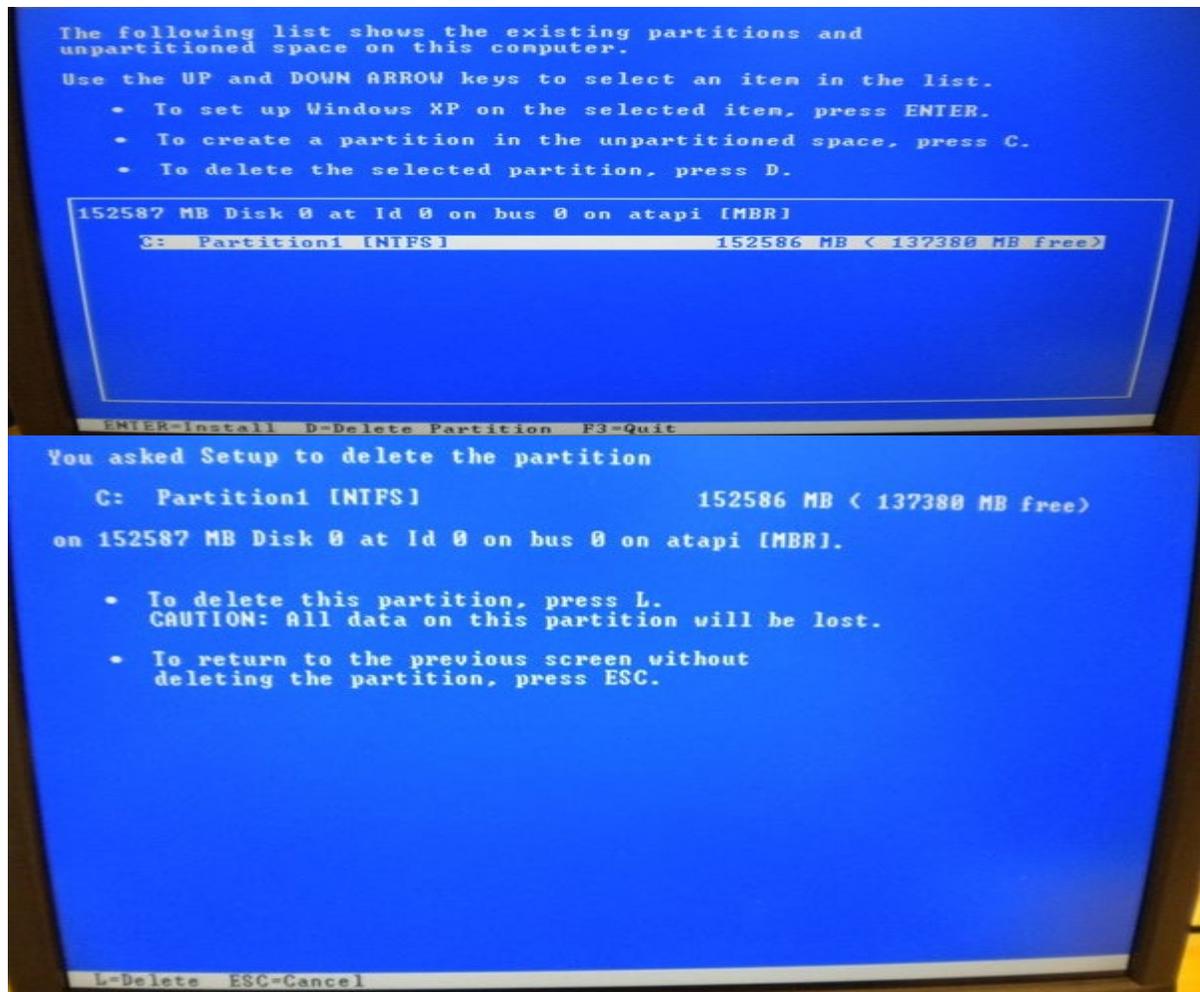

Step 3: Beginning the Process

After you have chosen to boot from the CD, you will have to wait a few minutes. The disk will check your hard drive to see if windows XP is currently installed on it. we will want to press Enter because you are planning on installing Windows XP on your system

## Step 4: Licensing Agreement and Begin Setup

just hit F8 (to agree) and move on to the next step in the installation. After pressing F8, you will come to the beginning of the Windows XP setup. On this page, you will want to press the Esc key on the keyboard.

## Step 5: Deleting the Current Partition

The following list shows the existing partitions and
unpartitioned space on this computer.

Use the UP and DOWN ARROW keys to select an item in the list.

- To set up Windows XP on the selected item, press ENTER.
- To create a partition in the unpartitioned space, press C.
- To delete the selected partition, press D.

152587 MB Disk 0 at Id 0 on bus 0 on atapi [MBR]
    C: Partition1 [NTFS]   152586 MB (137380 MB free)

ENTER=Install   D=Delete Partition   F3=Quit

You asked Setup to delete the partition

    C: Partition1 [NTFS]   152586 MB (137380 MB free)

on 152587 MB Disk 0 at Id 0 on bus 0 on atapi [MBR].

- To delete this partition, press L.
  CAUTION: All data on this partition will be lost.
- To return to the previous screen without
  deleting the partition, press ESC.

L=Delete   ESC=Cancel

Step 6: Beginning the Install

The following list shows the existing partitions and
unpartitioned space on this computer.

Use the UP and DOWN ARROW keys to select an item in the list.

- To set up Windows XP on the selected item, press ENTER.
- To create a partition in the unpartitioned space, press C.
- To delete the selected partition, press D.

152587 MB Disk 0 at Id 0 on bus 0 on atapi [MBR]
    Unpartitioned space   152586 MB
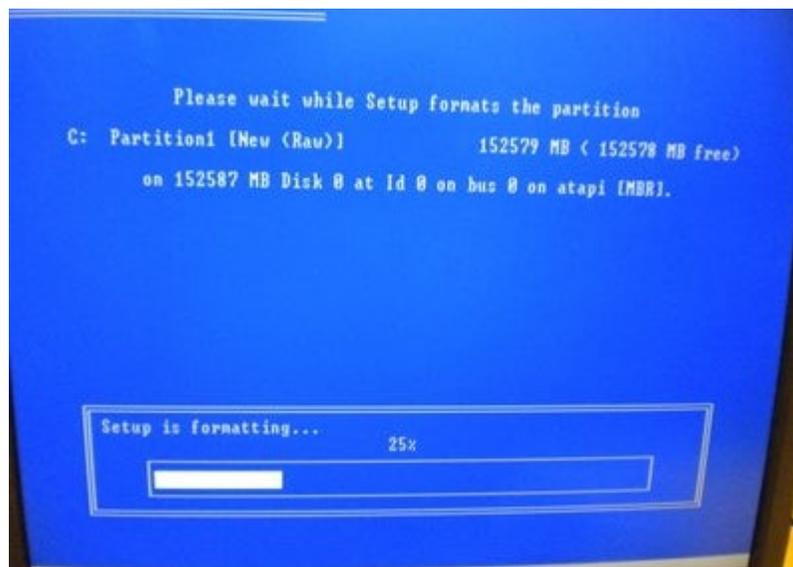

ENTER=Install   C=Create Partition   F3=Quit

Now that you have deleted the old partition, you will need to be sure that partition is selected and press the Enter key. This will tell the program that you want to install Windows XP on that partition.
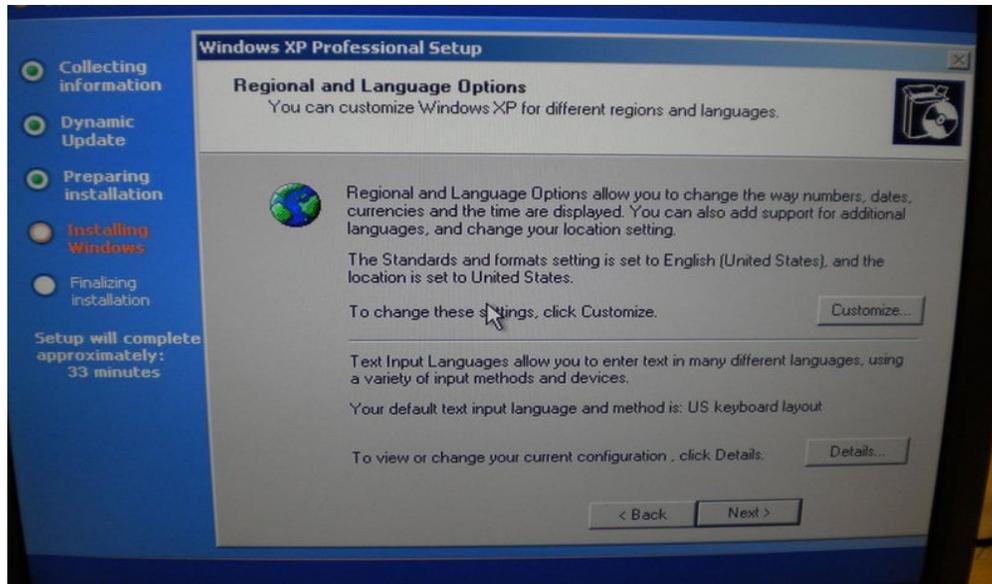

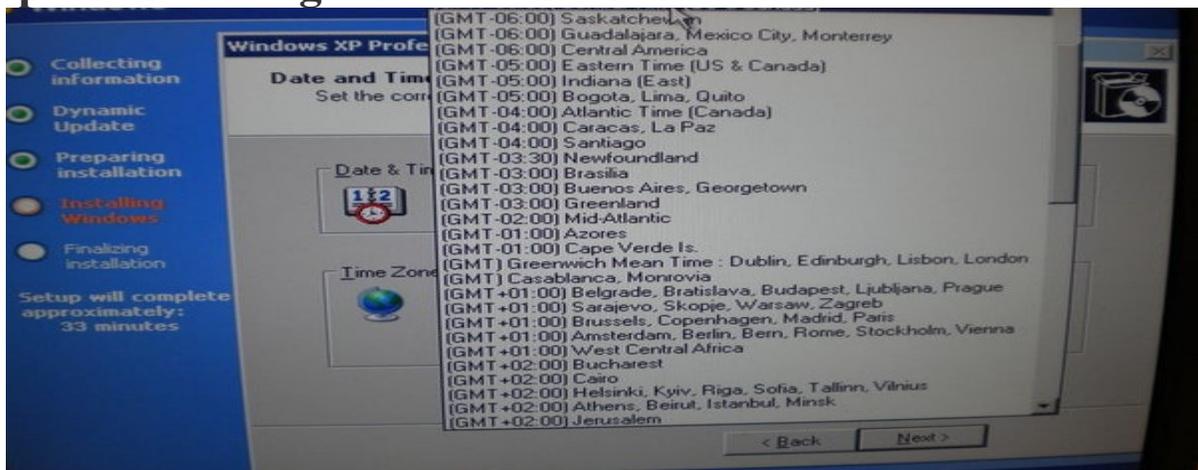

Step 7: Choosing the Type of Installation

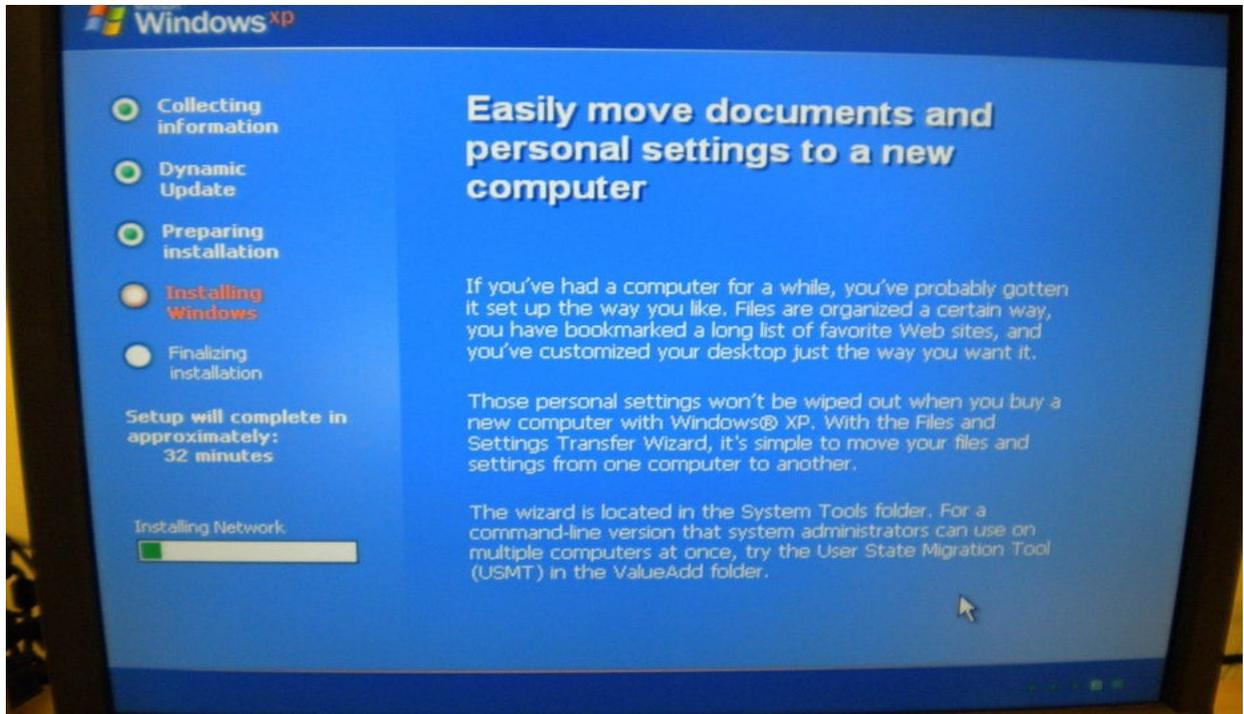

Step 8: Allowing Windows XP to Install
