Course Name: O Level (1st Sem)　　　　　　　　　　**Subject: WDP**

Topic: CSS [PART 03]　　　　　　　　　　　　　　　**Date: 22-05-20**

CSS on Body:

CSS designs the <body> element in the following ways-

Property	Value	Description
background-color	Red; / #ff0000; / rgb(255,0,0);	Colors the background
background-image	url("paper.gif");	Puts a background image
background-repeat	repeat-x;	Repeats the image horizontally
	repeat-y;	Repeats the image Vertically
	repeat-xy;	Repeats the image entirely
	no-repeat;	Does not repeat the image
background-attachment	fixed;	Background does not scroll
	scroll;	Background scrolls
background-position	top; / left; / bottom; / right;	Position of the background image

Syntax [background-color]:

```
<html>
  <head>
    <style>
      body
      {
        background-color:yellow;
      }
    </style>
  </head>
  <body>
  </body>
</html>
```
Output:
Syntax [background-image]:

```
<html>
  <head>
    <style>
      body
      {
        background-color:yellow;
        background-image:url('img1.jpg');
        background-repeat:repeat-x;
      }
    </style>
  </head>
  <body>
  </body>
</html>
```

Output:

NOTE:

1. As in the second syntax, _background-repeat_ has been used with _repeat-x_, _repeat-y_ would have repeated the image vertically. Similarly _repeat-xy_ would have repeated the image on entire background. A _no-repeat_ does not repeat the image.

2. _background-attachment_ works on the contents like-headings, paragraphs, images etc. whether to scroll with background or without background.

3. _background-position_ positions the image on the background. It is always used with _background-repeat: no-repeat_.

Assignment:

1. practise all the properties of css on <body>.
