Here in this code we see that two paragraphs are written with two subsequent headings- Introduction and History. The headings are given two id's- <u>intro</u> and <u>hist</u>.

In the upper part, just after the <body> tag, two hyperlinks are created with their targets- <u>#intro</u> and <u>#hist</u>.

The hyperlinks link their targets using their own id's.

**Output:**

Click on the headings and see what happens.
