

Attributes of <table> tag: The tag <table> has many attributes in HTML, out of which we are discussing some of the most popular ones-

1. **border:** to create a border of defined pixel width.

Syntax:

```
<table border = "1">
  ---
  ---
  ---
</table>
```

2. **bgcolor:** to provide a background color for the entire table.

Syntax:

```
<table bgcolor = "green">
  ---
  ---
  ---
</table>
```

3. **width:** to set a width of defined pixel for the entire table.

Syntax:

```
<table width = "300">
  ---
  ---
  ---
</table>
```

4. **height:** to set a height of defined pixel for the entire table.

Syntax:

```
<table height = "300">
  ---
  ---
  ---
</table>
```

5. **align:** to align the table horizontally on the screen. It can be left or center or right.

Syntax:

```
<table align = "center">
  ---
  ---
  ---
</table>
```

Assignment:

1. Apply all the attributes of <table> tag in the following table in HTML.

Name	Physics	Chemistry	Mathematics
Anand	78	69	90
Praveen	65	72	81
Suraj	86	88	94
