**Nero**: Nero is a utility software program that we use to write some data on to a CD/DVD. Nero is one of the most popular CD/DVD writing software that can write data files, audio files, video files and many more.

Though, Windows also provides in-built tools to write data on to a disk but that does not include variety of operations.

**Writing Data disk in Nero:**

1. Open Nero Start Smart
2. Select among CD/DVD, CD, DVD from the title bar.
3. Click on “Write Data CD”.
4. Now “ADD” the files to write to the CD. Observe the scale on the very bottom.
5. As the scale is filled, click on “NEXT”.
6. Next thing is to “INSERT” the blank disk and click on “BURN”.
7. Burning Starts. After it finishes, the disk itself comes out.

**Copying from Disk to Disk in Nero:**

1. Open Nero Start Smart.
2. Select among CD/DVD, CD, DVD from the title bar.
3. Insert the original disk and Click on “Copy CD”.
4. Now select your CD ROM as “SOURCE DISK” and select CD R/W as “DESTINATION DRIVE”.
5. Click on “COPY”.
6. Copying starts. Once it finishes, original disk comes out.
7. Now insert the blank disk and wait for the writing to finish.

**Assignments:**

1. What is Nero?
2. Write clear cut steps to write something onto a CD using Nero.
