# NIELIT Gorakhpur

## Chapter 2$^{nd}$ [Utilities]

**Nero:** Nero Burning ROM, also known as Nero, is a software application used for creating CDs and DVDs. Users can add data, audio, and video files to CDs and DVDs or copy one disc to another. Nero also allows users to create discs from ISO images, create bootable CDs, rip audio CDs, and other features. The ease-of-use that Nero provides makes it a popular choice for many computer users.

The software is part of the Nero Multimedia Suite but is also available as a stand-alone product. It is used for burning and copying optical discs such as CDs, DVDs, Blu-rays. The program also supports label printing technologies LightScribe and LabelFlash and can be used to convert audio files into other audio formats. Nero Burning ROM works with a number of optical disc image formats.

## Step-by-step instructions on how to burn a CD using Nero On Windows XP:

1. Open the Nero CD-burning program
2. Choose Data CD
3. Click Add to browse for your file
4. Select the file (or files) you want to add and then click add (when you are finished adding files, click close)
5. Click next
6. Click Burn and let the process finish
7. Click Done and your CD will automatically eject.
8. Close Nero and you are done!

## Exercise:-

1. 1-Write short note on Nero burning software.
2. 3-Write the steps to burn CD/DVD.
