

### Short Term Training Programs of 2/3 weeks

| Sl No                             | Name of the Training Program                      | Minimum Eligibility Criteria   | Minimum Duration (Hours)/Weeks | FEE (in Rs.) [plus Service Tax] |
|-----------------------------------|---|--|--------------------------------|---------------------------------|
| <b>Electronics &amp; Hardware</b> |   |  |                                |                                 |
| 01                                | BASIC ELECTRONICS AND CIRCUIT DESIGN              | H.S Science Pursuing or ITI in Electronics Trade pursuing or Pursuing Diploma Engg in Electronics or CSE or HSSLC with knowledge of Basic Electronics. | 20 / 2 weeks                   | 1500                            |
| 02                                | DSP USING MATLAB                                  | 10+2 PASS with knowledge of Basic Electronics  | 20 / 2 weeks                   | 1500                            |
| 03                                | EMBEDDED SYSTEM DESIGN USING 8051 MICROCONTROLLER | 10+2 PASS with knowledge of Basic Electronics  | 20 / 2 weeks                   | 2000                            |
| 04                                | PCB DESIGN  | H.S Science Pursuing or ITI in Electronics Trade pursuing or Pursuing Diploma Engg in Electronics or CSE or HSSLC with knowledge of Basic Electronics. | 20 / 2 weeks                   | 1500                            |
| 05                                | PC HARDWARE AND NETWORKING                        | Minimum 10 <sup>th</sup> Pass;<br>Prerequisites: Basic knowledge in computer is desirable.   | 30 / 3 weeks                   | 3500                            |
| 06                                | PC ASSEMBLY & MAINTENANCE                         | Basic knowledge of Computer  | 20 / 2 weeks                   | 2000                            |
| <b>IT &amp; Software</b>          |   |  |                                |                                 |
| 07                                | CORE JAVA PROGRAMMING                             | The student must be familiar with any Programming Language such as C   | 30 / 3 weeks                   | 2400                            |
| 08                                | PROGRAMMING with C++                              | Basic knowledge of Computer  | 30 / 3 weeks                   | 2400                            |
| 09                                | PHP (Hypertext Pre Processor)                     | Basic Programming Knowledge (preferably C language)  | 20 / 2 weeks                   | 2000                            |
| 10                                | DESKTOP PUBLISHING                                | Basic knowledge of Computer  | 20 / 2 weeks                   | 2000                            |
| 11                                | WEB DESIGNING                                     | Basic knowledge of Computer  | 20 / 2 weeks                   | 2000                            |
| 12                                | MULTIMEDIA  | Basic knowledge of Computer  | 20 / 2 weeks                   | 2000                            |
| 13                                | C PROGRAMMING                                     | Basic knowledge of Computer  | 30 / 3 weeks                   | 2000                            |
| <b>Soft Skills &amp; ITes</b>     |   |  |                                |                                 |
| 14                                | INTERVIEW FACING TECHNIQUES & GD                  | 10+2 Pass  | 20 / 2 weeks                   | 1500                            |
