## 1. Dot Net Developer

### Job Brief:

We are looking for a Dot Net Developer with more than 3 years of experience in accomplishing software requirements by developing and maintaining high performing, scalable, enterprise grade applications and databases.

Selected candidate will work for our Government Sector client that works on State mission-critical applications. This candidate will be responsible for .Net application development while providing expertise in the full software development lifecycle, from conceptualization and design to testing.

### Responsibilities:

- Design and develop high-volume, low-latency applications for mission-critical systems, delivering high-availability and performance.
- Contribute in all phases of the development lifecycle.
- Write well designed, testable, efficient code.
- Ensure designs are in compliance with specifications.
- Prepare and produce releases of software components.
- Support continuous improvement by investigating alternatives and technologies and presenting these for architectural review.

### Requirements:

- B.E./B.Tech/M.E./M.Tech/M.Sc./MCA degree in Computer Science, IT, Electronics or a related subject from recognized university with minimum 60% aggregate
- Proven hands-on Software Development experience
- Proven working experience in .net development
- In-depth knowledge on SQL Server 2008, 2008 R2, 2012 and 2014 with hands-on migration experience, excellent knowledge on all Administration Tools of Database Server - SQL Server Configuration Manager, SQL Server Surface Area Manager. Ability to design and deploy new database servers.
- Design and develop architecture and frameworks for products using ASP.NET (MVC), .NET, VB.net, ADO.Net, JavaScript technologies, SQL Server and .Net Core
- Design database schema, develop stored procedures and SQL Server Integration Services (SSIS) packages
- Proficient understanding of code versioning tools such as Git, SVN etc.
- Building architecture that ensures service qualities (performance, security, scalability, extensibility etc. for now and for the future.
- Lead architecture aspects of software development with strong emphasis on Object Oriented analysis and design (OOAD), layered application development, domain driven design, architecture design patterns
- Practice standard development process leveraging agile methodologies such as SCRUM and Test Drive Development.
- In-Depth knowledge of caching concepts, JSON and REST APIs
- Provide technical troubleshooting and application support.
- Develop and implement new products and provide information and support when required.
- Candidates with exposure to query optimization would be preferred
