A8-R4: BASICS OF OS, UNIX AND SHELL PROGRAMMING

अवधि: 03 घंटे अधिकतम अंक: 100 **DURATION: 03 Hours MAXIMUM MARKS: 100** ओएमआर शीट सं.: **OMR Sheet No.:** रोल नं:: उत्तर-पुस्तिका सं.: Roll No.: **Answer Sheet No.:** परीक्षार्थी का नाम: परीक्षार्थी के हस्ताक्षरः Name of Candidate: : Signature of candidate: परीक्षार्थियों के लिए निर्देश: **Instructions for Candidate:** कृपया प्रश्न-पुस्तिका, ओएमआर शीट एवं उत्तर–पुस्तिका में दिये गए निर्देशों को ध्यान Carefully read the instructions given on Question Paper, OMR Sheet and Answer Sheet. प्रश्न-पुस्तिका की भाषा अंग्रेजी है। परीक्षार्थी केवल अंग्रेजी भाषा में ही उत्तर कर सकता है। Question Paper is in English language. Candidate can answer in English language only. There are TWO PARTS in this Module/Paper. PART ONE contains इस मॉड्यल/पेपर के दो भाग है। भाग एक में चार प्रश्न और भाग दो में पाँच प्रश्न है। FOUR questions and PART TWO contains FIVE questions. PART ONE is Objective type and carries 40 Marks. PART TWO is भाग एक "वैकल्पिक" प्रकार का है जिसके कुल अंक 40 है तथा भाग दो, "व्यक्तिपरक" subjective type and carries 60 Marks. प्रकार है और इसके कुल अंक 60 है। PART ONE is to be answered in the OMR ANSWER SHEET only, भाग एक के उत्तर, इस प्रश्न-पत्र के साथ दी गई ओएमआर उत्तर-पुस्तिका पर, उसमें दिये गए अनुदेशों के अनुसार ही दिये जाने है। **भाग दो** की supplied with the question paper, as per the instructions contained therein. PART ONE is NOT to be answered in the answer book for उत्तर-पुस्तिका में **भाग एक** के उत्तर **नहीं** दिये जाने चाहिए। PART TWO. Maximum time allotted for PART ONE is ONE HOUR. Answer book भाग एक के लिए अधिकतम समय सीमा एक घण्टा निर्धारित की गई है। भाग दो की for PART TWO will be supplied at the table when the answer sheet उत्तर-पुस्तिका, भाग एक की उत्तर-पुस्तिका जमा कराने के पश्चात दी जाएगी। तथापि, for PART ONE is returned. However, candidates who complete निर्धारित एक घंटे से पहले भाग एक पुरा करने वाले परीक्षार्थी भाग एक की उत्तर-PART ONE earlier than one hour, can collect the answer book for पुस्तिका निरीक्षक को सौंपने के तुरंत बाद, भाग दो की उत्तर-पुस्तिका ले सकते हैं। PART TWO immediately after handing over the answer sheet for PART ONE. Candidate cannot leave the examination hall/room without परीक्षार्थी, उपस्थिति-पत्रिका पर हस्ताक्षर किए बिना अथवा अपनी signing on the attendance sheet or handing over his Answer उत्तर-पुस्तिका, निरीक्षक को सौंपे बिना, परीक्षा हाल नहीं छोड़ सकता हैं। ऐसा नही करने sheet to the invigilator. Failing in doing so, will amount to पर, परीक्षार्थी को इस मॉड्यूल/पेपर में अयोग्य घोषित कर दिया जाएगा। disqualification of Candidate in this Module/Paper. प्रश्न-पुस्तिका को खोलने के निर्देश मिलने के पश्चात एवं उत्तर देने से पहले उम्मीदवार यह After receiving the instruction to open the booklet and before answering the questions, the candidate should ensure that the

जब तक आपसे कहा न जाए तब तक प्रश्न-पुस्तिका न खोलें।

Question booklet is complete in all respect.

जाँच कर यह सुनिश्चित कर ले कि प्रश्न-पुस्तिका प्रत्येक दृष्टि से संपूर्ण है।

DO NOT OPEN THE QUESTION BOOKLET UNTIL YOU ARE TOLD TO DO SO.

PART ONE (Answer all the questions)

- 1. Each question below gives a multiple choice of answers. Choose the most appropriate one and enter in the "OMR" answer sheet supplied with the question paper, following instructions therein. (1x10)
- 1.1 The free software foundation was established in relation with
- A) BSD
- B) Linux
- C) GNU project
- D) Microsoft
- 1.2 Multiple UNIX commands can be put into a file to form a program. This is called a
- A) Pipe
- B) Script
- C) Link
- D) Shell
- 1.3 To invoke "bash" you type
- A) bsh
- B) sh
- C) bash
- D) Either A) or C)
- 1.4 The part of the UNIX operating system that interacts with the hardware is called
- A) GNU project
- B) The Kernal
- C) The Shell
- D) Linux
- Command used to open a connection to other UNIX host
- A) Telnet
- B) Command
- C) pid
- D) an
- 1.6 The name of the Superuser is
- A) Master
- B) Supreme
- C) Root
- D) President
- 1.7 The operating system controls
- A) Hard drive
- B) Processor
- C) Printers
- D) All of the above
- 1.8 Command used to take backup in UNIX
- A) tar
- B) du
- C) ps
- D) pwd

- 1.9 A file with permission status of RWXR_XR__ indicates
- A) The owner has all permissions, the group has only Read permissions.
- B) The owner has only Read and Execute permissions.
- The owner has all permissions, the group has only Read and Execute permissions.
- D) The group has all permissions, the owner has only Read and Execute permissions.
- 1.10 To list all the files in the directory including hidden files in long format use the following options with the "Is" command.
- A) -l
- B) -al
- C) -If
- D) -hl
- 2. Each statement below is either TRUE or FALSE. Choose the most appropriate one and enter your choice in the "OMR" answer sheet supplied with the question paper, following instructions therein. (1x10)
- 2.1 To start a process in the background, enter the command with # at the end.
- 2.2 Bourne shell was the first UNIX shell.
- 2.3 The purpose of the PATH variable is to tell the shell what directories to search when a command is entered.
- 2.4 Sort command is used to sort the lines of data in a file in reverse order.
- 2.5 In Linux everything is file.
- 2.6 The UNIX filesystem is hierarchical.
- 2.7 Shell takes care of inter process communication.
- Init is considered as the super daemon in UNIX.
- 2.9 If two files on same partition point to the same inode structure they are called Soft links.
- 2.10 In awk programming \$ sign is used for comment.

3. Match words and phrases in column X with the closest related meaning/ word(s)/phrase(s) in column Y. Enter your selection in the "OMR" answer sheet supplied with the question paper, following instructions therein. (1x10)

X		Υ		
3.1	q!	A. command is used to bring the background process to foreground.		
3.2	head	B.	command gives the first byte where the difference is in the file1 & file2.	
3.3	Hub	C.	Estimates file space usage.	
3.4	awk	D.	search contents of a file for a particular pattern.	
3.5	inode	E.	To quit out of vi without saving.	
3.6	du	F.	change the priority of a running	
3.7	Kernel	G.	command typically used for Modify/print selective contents of a file.	
3.8	cmp	H.	command is used to display the top of the file.	
3.9	sed	I.	core of the Unix operating system.	
3.10	grep	J.	program that is primarily concerned with formatting output.	
		K.	contains the information required to access the file.	
		L.	Only processes running in that terminal.	
		М.	An example of networking hardware.	

4. Each statement below has a blank space to fit one of the word(s) or phrase(s) in the list below. Choose the most appropriate option, enter your choice in the "OMR" answer sheet supplied with the question paper, following instructions therein. (1x10)

A.	mkfs	B.	multitasking	C.	FTP
D.	ps	E.	file	F.	cat
G.	sed	H.	Operating System	I.	ZZ
J.	chsh	K.	shutdown	L.	ping
M.	vi				

4.1	The method used by UNIX to do is called processor sharing.
4.2	command is used to display and create files.
4.3	command is used to display the characteristics of a process.
4.4	Command to save and exit from vi is
4.5	Controls and coordinates use of hardware among various applications and users.
4.6	is used to create a new file system.
4.7	init θ (zero) is used to the UNIX system.
4.8	The commands can be used to copy files across systems.
4.9	Inode data structure is used to maintain identification.
4.10	A user can change the default log-in shell using command.

PART TWO (Answer any FOUR questions)

b) c)	Describe UNIX file system organization. What are the major activities of an operating system in regard to process management? What is an X Server? Who wrote Linux and how is it Licensed? (5+4+3+3)
b) c) d)	What is the difference between home directory and working directory? What is the difference between internal and external commands in Linux? What are Pipes? Explain use of pipes. What does nslookup do? Explain its two modes. List some important characteristics of soft links. (3+3+3+3+3)
b) c) d)	Write a Script to display the sum of all the digits of a number. What do you understand by File modes in UNIX? What are the fields in the /etc/passwd file? What is the difference between Command mode & Insert mode in vi? (6+3+3+3)
b) c) d)	What is use of sed command? What is Linux Shell? What is Shell Script? What are the process states in Linux? Write a awk script to print square of numbers from 1 to 5. (4+3+4+4)
a) b)	Explain system calls used for process management in Linux. Discuss the role of a System Administrator. What are the runlevels in Linux? (5+5+5)
